

Citywide Route Patrol

Citywide Route Patrol works with your asset and maintenance data in Citywide Maintenance and Citywide Assets to help field staff complete asset patrols. Accurately and efficiently complete routine and winter patrols with automated work orders, route planning, and automatic maintenance standard compliance checks.

Benefits of Citywide Route Patrol

-  Efficiently complete road & winter patrols with optimized routes
-  Easily collect data in the field with iOS & Android apps
-  Create work orders, service requests & mark deficiencies on patrol
-  Limit corporate risk with advanced record keeping & custom maintenance standards
-  Access key information & perform tasks from anywhere
-  Generate reports using patrol compliance & deficiency resolution data

Key Features & Functions

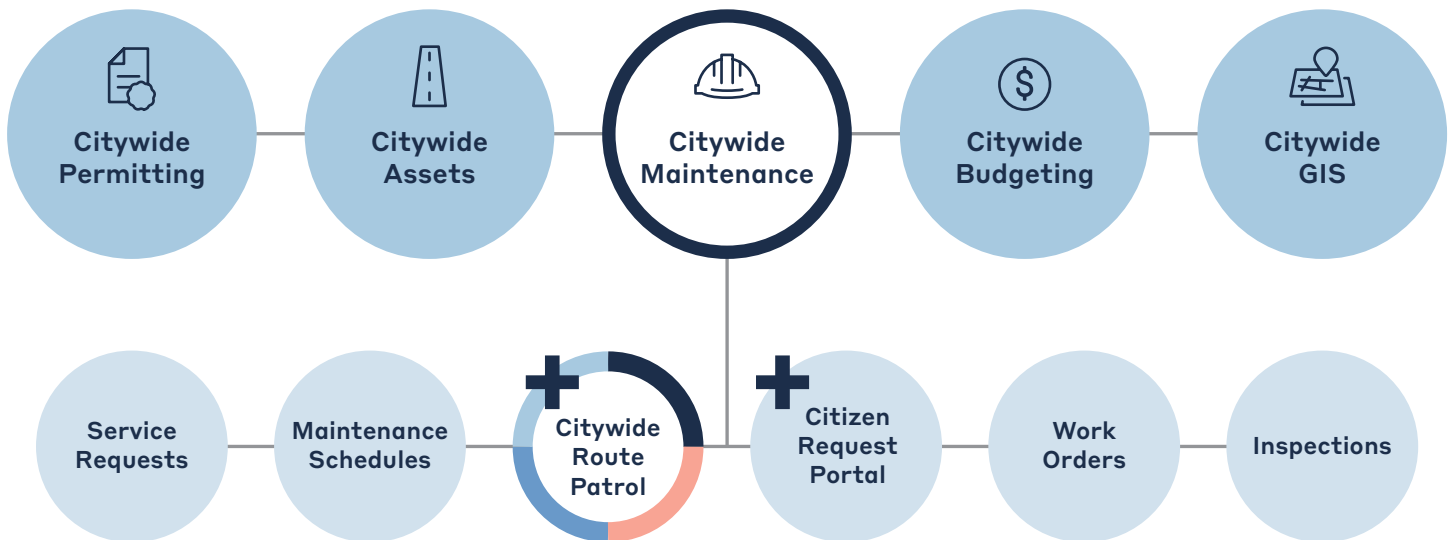

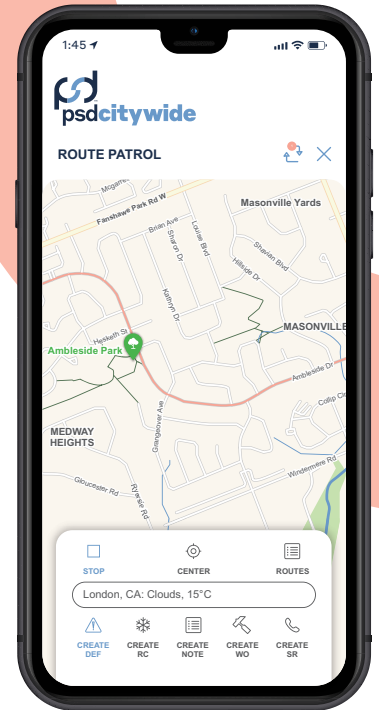

- Android & iOS apps
- Advanced route planning
- Routine & winter patrol options
- Review & resolve deficiencies
- Weather & road condition reporting
- Customize maintenance standards
- Enforce asset-level compliance
- Detailed reporting & logs
- Map patrol history

How Citywide Route Patrol works with our Citywide Enterprise Asset Management System (EAMS)

Citywide Route Patrol is part of the Citywide Maintenance module and EAMS — it works with your data to create and execute efficient routine and winter patrols. Feed patrol information directly into Maintenance Manager to log maintenance standard compliance status, identify deficiencies, and generate work orders to resolve issues within set resolution times.

Easily and accurately complete patrols with all the tools you need.
